## PACKARD Radio "A" Batteries

A high quality, reliable "A" battery that can be conscientiously recommended and backed by an iron-clad guarantee.

The PACKARD battery is built by one of the largest and best known manufacturers of automobile and radio storage batteries in the Middle West. None but the best materials are used in the PACKARD battery. The low price we are able to quote is made possible by large volume production.

We list the PACKARD Radio "A" Battery in three popular sizes. These three sizes will meet the requirements of practically any type of radio receiver from the smallest up to the most elaborate seven, eight and nine tube sets.

PACKARD Radio "A" Batteries are put up in handsome leak-proof one piece rubber containers equipped with convenient carrying handle. Binding posts have black (negative) and red (positive) rubber composition thumb nuts for ready identification of the terminals. Shipped fully charged, ready for service.

RR-11 recommended for general use on 4 and 5 tube sets.
